The company maintains a motivated, creative and experienced team and a versatile range of compliant and fully certified diving equipment which can be configured to provide diving solutions for any worksite.

Field/Seabed Survey

Non Destructive Testing

Construction

Installation

Bluestream has extensive working experience and track record in the offshore industry, especially in conditions that occur in the North Sea with limited visibility and high currents.

Diving Services

Bluestream Diving offers a 24-hours diving services: conventional air and nitrox diving, mixed gas and saturation diving from DP2 vessels, 4 point mooring vessels, barges or fixed installations. The available mobile diving stations consist of modern equipment all built in accordance with international diving legislation, certifying authority standards and IMCA design and operating guidelines.

Bluestream can offer a wide range of diving services:

- Inspection-, Repair- and Maintenance work
- Non Destructive Testing Services
- Construction & Installation work:
- Subsea Well Intervention
- Field- or Seabed Surveys
- Drilling Support

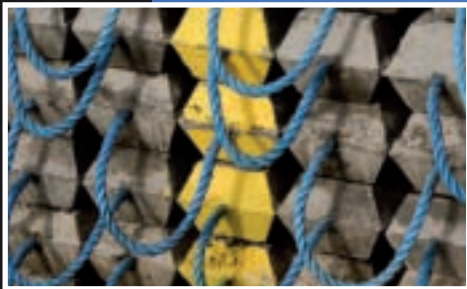

Project Management & Engineering

Bluestream Diving can provide a comprehensive suite of innovative project management and engineering services that can be customized to meet the individual need of each client. The flexibility, fast development and efficiency of Bluestream ensures the delivery of on time and cost effective engineered solution that comply to the client's requirements and with all safety, quality, environmental and industry best practices.

Safety

Bluestream's major drive is a safe operation in every aspect of work. It is our goal to carry out contracted work in a controlled manner, safely and maintaining high quality standards, whilst meeting minimally the client's specification and statutory regulations and specifications. An indispensable resource for achieving this in the combined system for assuring quality, health, safety, welfare and environment that integrates all these aspects.

Quality

Bluestream Diving is ISO 9001:2008 and VCA/SCC** certified. Bluestream is also member of the International Marine Contractors Association (IMCA) and is registered with First Point Assessment Ltd. (FPAL). All containers are tested under Lloyd's & DNV register. Equipment is tested every 6 months to ensure quality and safety. For the performance of diving projects Bluestream employs qualified and experienced diving personnel.
