Non Destructive Testing

Company profile

Bluestream Rope Access is an inspection, installation, maintenance and repair company dedicated to provide quality services to a wide range of industries. We provide qualified personnel to perform specific tasks at height or difficult accessible locations using rope access techniques in combination with full project management.

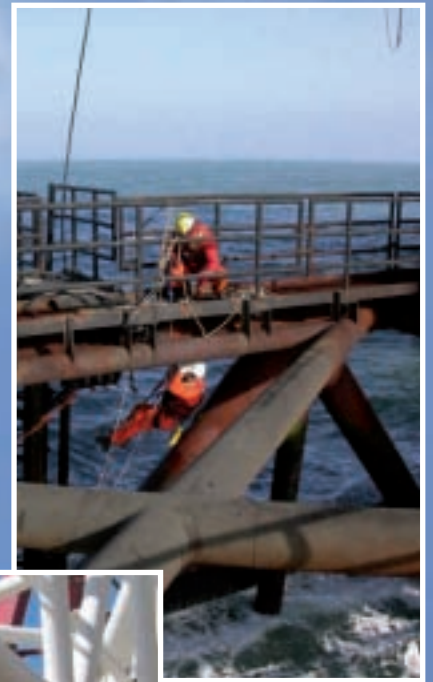

What is Rope Access?

The rope access technique is a proven safe and cost effective method for reaching difficult worksites. IRATA qualified personnel use climbing systems attached to a safety harness and special ropes to ascend or descend in a controlled manner. For access operations requiring a prolonged stay or additional stability mobile platforms can be deployed to increase safety and efficiency.

Where to use Rope Access?

Our rope access services can be provided for:

- Mechanical engineering
- Installation & fitting
- Non Destructive Testing (NDT)
- Cleaning & surface preparation
- Grit blasting
- Fabrication & construction
- Internal access operations
- Concrete inspections
- Painting (spray & manual)
- Welding

Non Destructive Testing (NDT)

NDT services are provided by qualified NDT technicians (ASNT/PCN). In addition to services provided on-site we offer a comprehensive range of material testing at our inspection facilities. All inspections are provided under strict quality control procedures. Bluestream Rope Access provides the following inspection techniques:

- Magnetic particle inspection
- Ultra sonic inspection
- Eddy current inspection
- Visual inspection
- Penetrant testing
- Corrosion inspection
- Video inspection
- Endoscopic inspection
- Defect sizing
- TOFD weld examination

Safety

Bluestream Rope Access operates according to strict operating procedures and safety standards which reflect our commitment to personnel and clients. All training and assessments are conducted by independent trainers and assessors approved by the IRATA (Industrial Rope Access Trade Association). The rope access equipment is strictly maintained and subject to a six monthly certification. Bluestream Rope Access is an IRATA member and also VCA/SCC** certified by Lloyd's Register.

Quality

Bluestream Rope Access is ISO 9001-2008 certified. Personnel and equipment are provided in accordance with written standards and procedures. Frequent evaluation of training and certification for personnel and external calibration of NDT equipment, assures the quality of our services.

Applications

We offer a comprehensive package of services e.g. in the following areas:

- Offshore oil & gas platforms
- Buildings & industrial plants
- Drilling rigs & semi-submersibles
- Fabrication yards
- Vessels & tankers
- Bridges
- Communication towers
- Chimneys
- Power stations
- Vent stacks
