

QHSE Engineer

Reports to

QHSE Manager

Purpose

To promote Quality, Health, Safety and Environmental (QHSE) awareness, actively advise the line organisation on QHSE-related matters and facilitate QHSE training/familiarisation. This includes helping maintain and develop the company's certified management systems, quality assurance in tendering, project management, risk assessment and cooperating in audits.

Tasks & responsibilities

- Operational support for QHSE-related topics in the tender, implementation and project phase, such as HIRA, etc.
- Facilitate HSE training/familiarisation for permanent staff, offshore professionals and subcontractors.
- Assist in the development, maintenance and implementation of the company management systems.
- Initiate, implement and maintain QHSE documentation and procedures.
- Assist in performance and follow up company-wide and project risk assessments and plans.
- Provide operational support, training and advice to implement correct level of QHSE awareness.
- Review project-related QHSE documents, ensure compliance with project, company and local legislative QHSE requirements.
- Participate in operational meetings.
- Lead investigation of incidents, analysing, assessing corrective measures and monitoring the implementation of corrective measures.
- Monitor the implementation of activities to prevent reoccurrence.
- Monitor and ensure timely close out of non-conformance and audit reports and perform investigations where required.
- Assist in QHSE Reporting and analysis (e.g. summaries of incidents, non-conformance and audit reports and QHSE statistics).
- Plan and carry out internal, project, supplier and sub-contractor audits.
- Assist in external audits.
- Assist in the translation and provision of information about new legislation, regulations and corporate guidelines and implement them where applicable.
- Responsible for compliance with SCC (VCA) and ISO standards.

In the absence of the QHSE Engineer, tasks will be undertaken by the QHSE Manager.

Authorities

Request information necessary to perform the task and stop work if not in compliance with QHSE standards.
